

The versatile Robe FAZE 1000 FT fazer is equipped with the most sophisticated features and leading edge technology including an aluminium cast heater, a very quiet pump, high precision PCB design and controllable twin fans. The new high efficiency heater technology ensures low fluid consumption of less than one litre per two hours of continuous fogging (30% output). The durable twin fans and the DMX Fog Control module ensure high precision output control. High quality bearings in the fans allow silent operation, makes the machine ideal for use in the noise sensitive environments like theatres and TV studios. The FAZE 1000 FT is an ideal choice for stage and sound professionals.

Features

- Power: 100/120/230/240 V AC, 50/60Hz
- Heater: 1,000W
- Tank Capacity: 2.5 litres
- Output: 3,500 cuft./min
- Heat up Time: 12 min
- Liquid Consumption Rate: 45 min. / litre (100%), 2hrs / litre (30%)
- Control Module Included: DMX Fog Control
- Weight: 20.5kg
- Dimensions: 635 x 275 x 281 mm
