

The Beyerdynamic SHM 805 F Condenser Gooseneck Microphone Shotgun is a pencil-sized condenser microphone with a very low visual profile making it almost invisible in most applications.

As a gooseneck microphone, The Beyerdynamic SHM 805 F Condenser is suitable for podium/pulpit conferencing or boardroom applications. Due to the hypercardioid/lobe polar pattern this microphone ensures clear speech transmission with extremely low feedback. The polar pattern is achieved due to the special construction of the capsule and its housing.

Features

- Condenser gooseneck microphone, shotgun
- Length 500 mm
- Rigid tube
- XLR female
- WS 88 windscreen
- Slim-line housing with matt black finish
- Hypercardioid/lobe polar pattern
- Low visual appearance
- Extremely low feedback
- Pick up angle $\pm 40^\circ$
- Wide, linear frequency response optimised for clear speech transmission
